Pile driver

PPA 230 J / 550 J - Agricultural Piledriver

Tracked pile driver

PPA is a tracked machine for the construction of vineyard systems, fully controllable via Orteco GPS Machine Control System: a simple, small-sized and easy-to-use, safe machine, designed to increase productivity and reduce costs. Thanks to Orteco's geolocalized autonomous displacement, the machine moves automatically, moving to the driving points with top notch precision, cutting the driving at the pre-set height.
